Bespoke Lockers

Our objective is simple, to create a functional aesthetically pleasing solution for your changing rooms.

Experienced working with architects, designers, contractors and end users, we aim to provide maximum support from the design concept through to completion.

Cloakroom Solutions offer a range of high quality modular lockers in a hardwearing aluminium carcass with a choice of either 12mm laminate doors in the Forza range or a flush fronted glass door with the iLocker.

These lockers are ideal for use in wet or dry areas and boast the finest materials for a striking design without compromising security or durability, providing a maintainable and safe system for the modern leisure facility.

Forza shown in the Z shape with cam locks.

iLocker shown with digital code locks

Carcass:

- 1.2mm folded aluminium sides with solid laminate rear support (to aid width adjustment)

Shelves:

- 12/13mm white solid grade laminate.
