

FS70 Coat Rails

The FS70x28 range of coat rail is fabricated from highly durable satin anodized aluminium frames with either fixed hanger or hook options.

The hangers are suspended from individual carriers which ensures even spacing for both ease of use by the cloakroom attendants as well as preventing garments from being crushed together.

FS70x28.1 Single Height Coat Rail

Double height coat rails enables greater capacity within the cloakroom space.

FS70x28.5 Double Height Coat Rail

The introduction of support posts enables rails to be extended run the length of the wall.

Rails can be set at either double or single height or a combination of both for regular and long coats.

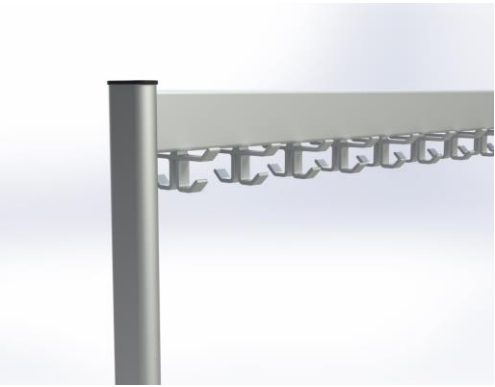

FS70x28.5/1 Combination Coat Rail

When a rail can be wall mounted there is the option for end fixing, removing the need for one support post.

The wall to floor option can be single or double height and can be extended with additional modules.

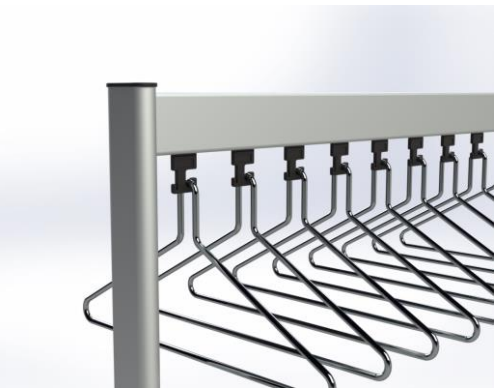

FS70x28.9 Wall to Floor Coat Rail

Quadruple hooks

Standard base

Hangers

Free standing base

Issue tags & numbering

Wall tie

Environmental Sustainability

The aluminium used for production of rails is from recycled raw materials.

In addition, the production plants use photovoltaic systems to provide sustainable electricity as well as use of heat recovery systems to provide reduction in heating energy through the facility.
